International Classification of Epileptic Seizures

I. Partial seizures
   A. Simple partial seizures
      1. With motor signs
         a. Focal motor without march
         b. Focal motor with march (Jacksonian)
         c. Versive
         d. Postural
         e. Phonatory
      2. With somatosensory or special-sensory symptoms
         a. Somatosensory
         b. Visual
         c. Auditory
         d. Olfactory
         e. Gustatory
         f. Vertiginous
      3. With autonomic symptoms or signs
      4. With psychic symptoms
         a. Dysphasia
         b. Dysmnesic
         c. Cognitive
         d. Affective
         e. Illusions
         f. Structured hallucinations
   B. Complex partial seizures
      1. Simple partial seizures at onset, followed by impairment of consciousness
         a. With simple partial features
         b. With automatisms
      2. With impairment of consciousness at onset
         a. With impairment of consciousness only
         b. With automatisms
   C. Partial seizures evolving to secondarily generalized seizures
      1. Simple partial seizures evolving to generalized seizures
      2. Complex partial seizures evolving to generalized seizures
      3. Simple partial seizures evolving to complex partial seizures evolving to generalized seizures

II. Generalized seizures
   A. Absence seizures
      1. Typical absence seizures
         a. Impairment of consciousness only
         b. With mild clonic components
         c. With atonic components
         d. With tonic components
         e. With automatisms
         f. With autonomic components
      2. Atypical absence seizures
   B. Myoclonic seizures
   C. Clonic seizures
   D. Tonic seizures
   E. Tonic-clonic seizures
   F. Atonic seizures
